Altos Solutions Announces Appointment of Carla C. Wood as President

Experienced Oncology Professional to Lead Company in Innovation and Market Expansion

Los Altos, California—June 28, 2011—Altos Solutions, Inc., the pioneer in web-based software applications for community-based oncology practices, announced today the appointment of Carla C. Wood, CPC, MS, as president.

“Carla Wood brings to our company an impressive experience in both the oncology industry in general and in Altos Solutions specifically,” said John T. Willey II, co-founder and CEO of Altos Solutions. “Since joining Altos in 2007, she has taken a leadership role in product development, market expansion, and the building of our customer support capabilities. Her thorough knowledge of customer needs and the oncology industry are a perfect fit for leading Altos to greater product development and market share.”

Wood began her career in oncology through patient support groups and patient-reported outcomes technology products. Prior to joining Altos, Wood was Director of Product Development for Supportive Oncology Services and Accelerated Community Oncology Research Network (SOS/ACORN). She also has worked with Schering Plough.

At Altos, Wood has been instrumental in establishing the customer support and training departments, while working closely with the product development team. She pioneered the use of electronic medical record (EMR)-based Alerts to provide on-label clinical information directly to the physician, exactly when he/she needs it assuring proper utilization of drugs and appropriate payment. She defined and managed the first certification of an oncology EMR. Wood helped the first oncology physicians successfully attest for Meaningful Use under CMS’s EHR Incentive Program earlier this year.

“Throughout my tenure at Altos, I’ve seen the leading edge thinking and product development to which the company is committed,” commented Wood. “We have constantly pushed ourselves and our products to the invisible edge of development. For example, we are so proud to be the first ONC Certified oncology EMR to support Meaningful Use. I am looking forward to leading Altos Solutions in the ongoing enhancement of cancer care in the U.S. As a company, we are committed to remaining the leader in innovative enhancements for our customers and their patients.”

About Altos Solutions

Altos Solutions is the pioneer in web-based software applications for community-based oncology practices, focusing on intuitive applications that provide high-quality oncology-specific solutions with low-cost implementation. Altos has innovative product solutions in Electronic Medical Records, Practice Management, and Patient and Provider Portals. Oncology Metrics, a division of Altos Solutions, fosters a network of independent community-based oncology practices to provide a platform of knowledge-based products and services. Altos Solutions is the first company in the US to offer oncology practices an oncology-specific EMR application combined with services to collect, benchmark, and analyze the data contained in these records. Altos Solutions has an installed base of 800+ oncology clinicians and thousands of daily users. Altos Solutions is headquartered in Los Altos, California.
