EMR Early Adopter Upgrades to Web-Based Oncology EMR

*Maine Center for Cancer Medicine Replaces Existing EMR Vendor
with OncoEMR to Better Meet Needs*

Los Altos, California—October 26, 2010—Altos Solutions, Inc. is pleased to announce that the Maine Center for Cancer Medicine of Scarborough, Maine has signed a contract to implement OncoEMR, the leading oncology-specific, web-based electronic medical record application. The Maine Center for Cancer Medicine (MCCM) will be converting to OncoEMR to replace their existing EMR, which they have had in place for more than five years.

As the EMR market matures, practices such as MCCM who were early adopters of EMR technology are now upgrading to more nimble and robust EMRs. Features that influenced the MCCM's decision to move to Altos Solutions include OncoEMR's cloud or web-based application, its oncology-specific design for community-based practices, and its history of leading edge innovation with features such as e-prescribing, PQRI reporting, its patient portal, SeeMyChart, and most recently iPad, iPhone, and Droid capabilities. OncoEMR's aggressive strategy to become one of the first EMRs certified for Meaningful Use also was a motivating factor.

"The Maine Center for Cancer Medicine is a very savvy EMR user, given that we have been using EMRs for more than 10 years," stated Steven L. D'Amato, RPh, BCOP, Clinical Pharmacy Specialist. "OncoEMR is the third EMR that we have implemented, so we know what to look for. We chose OncoEMR because of its robust functionality that aligns with our practice needs moving forward, and Altos understands the business needs of a busy oncology practice. They were the first to have e-prescribing and PQRI reporting, for example, and they listen to their customers' needs."

"We see the MCCM's selection of OncoEMR as a strong endorsement that our application meets the needs of those early adopting practices upgrading their EMR," commented Warren M. Dodge, President of Altos Solutions, Inc. "OncoEMR will enable Maine to conform to Meaningful Use requirements from the first day they implement. I think that one of the features that will be most exciting to the Maine Center staff is just how quickly and painlessly upgrades are made to OncoEMR because it is all done by Altos behind the scenes."

Maine Center for Cancer Medicine & Blood Disorders

Maine Center for Cancer Medicine & Blood Disorders opened in 1978 and currently has 14 physicians and 6 physician extenders in five locations. MCCM (www.mccm.org) is the largest private medical oncology practice in Northern New England that represents nearly 50% of the cancer specialists in Maine.

About Altos Solutions

Altos Solutions is the pioneer in web-based software applications for community-based oncology practices, focusing on intuitive applications that provide high-quality oncology-specific solutions with low-cost implementation. Altos has innovative product solutions in Electronic Medical Records, Practice Management, and

Patient and Provider Portals. Altos' new Oncology Metrics division fosters a network of independent community-based oncology practices to provide a platform of knowledge-based products and services. Altos Solutions is the first company in the US able to offer oncology practices a specialty-specific EMR application combined with services to collect, benchmark, and analyze the data contained in these records. The company has an installed base of 600+ clinicians and thousands of daily users. Altos Solutions is headquartered in Los Altos, California.
